

SerTRaline for AnxieTy in adults with a diagnosis of Autism (STRATA). A randomised controlled trial.

**Do you have a diagnosis of autism?
Are you looking for treatment of anxiety?
Take part in the STRATA study**

We are inviting adults with a diagnosis of autism to take part in the STRATA study - the largest study on the treatment of anxiety in autistic people. The study has been co-produced with experienced clinicians, researchers, and autistic people.

The study is recruiting participants across the UK, and appointments can be conducted by your preferred method, such as via video call, on the phone, or in person.

To read about the study and express an interest to take part, please scan the QR code below or visit www.bristol.ac.uk/strata

For further information, visit our website, express an interest, or contact us:
